`Talking Rabbitt: Conversational AI for Business Data

Empowering business leaders to get instant insights through natural language queries

AI Product Manager Challenge | Strategy Pitch Deck

Made with GAMMA

The Data Challenge Facing Modern Businesses

Businesses struggle to extract meaningful insights from their data, creating bottlenecks that slow down decision-making and limit competitive advantage.

Complex Dashboards

Traditional BI tools require extensive training and technical expertise to navigate effectively

Technical Barriers

Managers without SQL or BI tool knowledge are left waiting for analyst support

Time-Consuming Analysis

Simple revenue analysis takes 10-15 minutes per query, multiplying across multiple questions

Made with GAMMA

Introducing Talking Rabbitt

Natural Language Analytics

Ask questions like you would ask a colleague and get instant, actionable answers powered by AI.

Example queries:

- Which region had highest revenue?
- Which product sold most in Q2?
- Compare sales performance across quarters

Text Answers

Clear, concise responses in plain language

Visual Charts

Automatic visualization generation

Data Analysis

Intelligent processing of complex datasets

Made with GAMMA

Competitive Landscape

While established players dominate dashboard visualization, none offer true conversational analytics at scale.

Company	Tool	Strength
Tableau	Data Visualization	Powerful dashboards
Power BI	Microsoft Analytics	Enterprise integration
Darwinbox	HR Analytics	HR-focused solutions
Talking Rabbitt	**Conversational AI**	**Natural language queries**

Made with GAMMA

Our Strategic Advantage

Conversational Analytics

Query data using natural language instead of complex dashboard navigation or SQL commands

Faster Insights

Get answers in seconds instead of minutes, accelerating decision cycles across the organization

No Training Required

Eliminate weeks of dashboard training and technical skill requirements for business users

AI-Powered Intelligence

Machine learning delivers context-aware responses and automatic insight detection

Made with GAMMA

Ideal Customer Profile

Talking Rabbitt targets mid-market to enterprise organizations with distributed data needs and non-technical business users.

Target Industries

- Retail chains with multiple locations
- Sales organizations with regional teams
- Hotel and hospitality groups
- E-commerce platforms with product catalogs

Primary Users

- Sales managers tracking performance
- Business leaders making strategic decisions
- Operations managers optimizing processes
- Marketing teams analyzing campaign results

Customer Pain Points & Our Solution

Slow Excel Analysis

Manual pivot tables and VLOOKUPs consume hours

Confusing Dashboards

Non-technical users feel overwhelmed by complex interfaces

Instant Insights

Ask once, get answers immediately

Traditional approaches create dependency on data teams and slow down business operations. Talking Rabbitt eliminates these bottlenecks by enabling anyone to query data directly using natural language.

Made with GAMMA

Core Product Features

01

Natural Language Queries

Ask questions in plain English and receive accurate, context-aware answers powered by AI

02

Automatic Charts & Insights

Visualizations generated automatically based on query context, with key trends highlighted

03

CSV/Excel Upload Support

Import data from spreadsheets without requiring database connections or technical setup

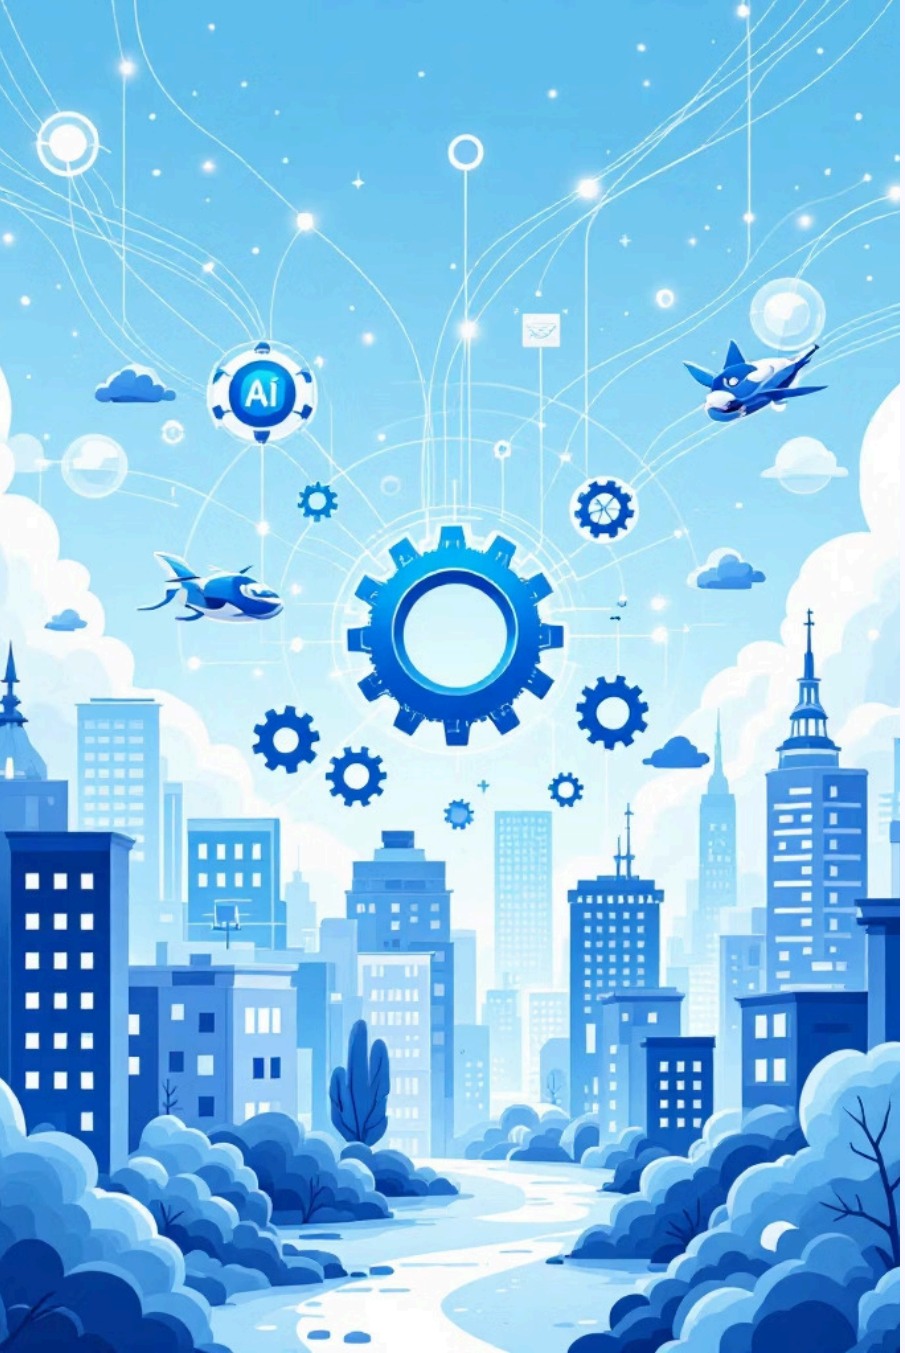
Made with GAMMA

Feature Priority Framework

Strategic prioritization balances user value against implementation effort to maximize ROI.

Feature	Value	Effort	Priority
Natural Language Processing	High	Medium	**High**
Automatic Chart Generation	Medium	Low	**High**
Data Export/Integration	Medium	Medium	Medium
Alerts & Notifications	Medium	Medium	Medium
Advanced Analytics	High	High	Medium

Made with GAMMA



Why Talking Rabbitt Wins

First-Mover Advantage

Conversational analytics still an emerging category with room for disruption

Product-Led Growth

Free tier enables viral adoption across teams without sales friction

High Retention

Switching costs increase as users build query history and integrations

> *"Talking Rabbitt transforms data from a bottleneck into a competitive advantage by putting insights directly in the hands of business users."*
